COMMUNICATION No. 50804

October 3, 2016

Re: ***Summarized foreign trade and foreign exchange regulations in force as of the end of September 2016***

This summary is published as a guide to the main aspects of foreign exchange regulations in force at the end of September 2016. These Communications are available at the Central Bank's website www.bcra.gob.ar Sistema Financiero y de Pagos / Marco Legal y Normativo / Buscador de Comunicaciones.

Communication "A" 6037 issued on August 8, 2016 provided for significant changes in the general conditions under which the foreign exchange market had been operating since 2002. The new regulation specifies that foreign exchange transactions may be conducted by submitting an affidavit of the reasons behind the foreign exchange transaction, except in cases of specific requirements which, in general, remove the obligation to provide supportive evidence of the reasons behind each foreign exchange transaction.

Monthly limits to carry out foreign exchange transactions have also been revoked. Foreign exchange restrictions only limit the use of cash (as part of the anti-money laundering policy) and the access to the market for derivative transactions entered into with counterparties abroad.

September releases include Communications "A" 6057, "A" 6058, "A" 6067 and "C" 72679.

1. **GENERAL RULES OF THE FREE AND SINGLE FOREIGN EXCHANGE MARKET**

Please refer to paragraph I of the Annex to Communication “A” 6037, amended by Communication “A” 6058.

1.a. **Characteristic features, exchange tickets and movements in pesos related to foreign exchange transactions**

- According to the provisions of Decree No. 260/2002 which provided for the creation of a Free and Single Foreign Exchange Market, foreign exchange transactions must be conducted at a freely agreed exchange rate and must be subject to requirements and regulations of this Central Bank.
- Foreign exchange transactions must be carried out through institutions authorized by the Central Bank within the scope of their operation and pursuant to applicable rules and regulations, along with specific requirements established or to be established for each transaction.
- Any transaction carried out between institutions and their customers must be supported by an exchange ticket. Each foreign exchange transaction shall be supported by an exchange ticket (for either currency purchase or sale), which shall be deemed as an affidavit from the originator of the exchange transaction; the affidavit comprises the purpose of the transaction, among other items.
- Financial institutions and foreign exchange houses shall follow a procedure to ensure that the beneficiary is informed—no later than 24 business hours after funds have been credited in the correspondent account—of the fact that the amount received in foreign currency may be exchanged or deposited in local accounts in foreign currency.
- Residents in Argentina may access the local foreign exchange market in these cases: (i) funds collected from and/or payments related to transactions with non-residents, (ii) funds collected from and/or payments to local financial institutions and/or debt security issues in foreign currency; and/or (iii) purchase or sale of their own foreign assets. Such transactions shall be carried out under conditions set out in paragraphs 2 to 7 and 9 of this summary.
- General Rules (paragraph 1) and those specified in paragraph 8 below shall be applied to non-resident transactions.
- The above-mentioned affidavit that includes the purpose of the exchange transaction in each exchange ticket is sufficient for residents and non-residents to have access to the foreign exchange market, except in the cases where specific regulatory requirements are set out.

BANCO CENTRAL
DE LA REPÚBLICA ARGENTINA

- Financial institutions must provide complete information about the originator and the beneficiary and adopt proceedings to pinpoint transfers from abroad with insufficient information; in such cases, transfers must stay pending until omissions are remedied.

Minimum information required: (i) full name, (ii) address or identity number or Client's Taxpayer Identification number (CUIT), Employee Identification number (CUIL) or Identity Code (CDI), and (iii) customer identification at the originator's institution.

- In foreign exchange transactions, all currency movements either in foreign exchange or in pesos have to be made in the name of the customers. In this sense, movements in local currency other than those made in cash, must correlate to movements in the accounts of the customers, or in joint accounts, where the customer performing the exchange transaction is one of the customers.

Proceeds from the settlement of foreign exchange from residents — irrespective of its type — that exceed the equivalent of US\$ 2,500 per calendar month established for all institutions authorized to trade in foreign exchange should be credited to a checking or savings account in pesos at a local financial institution on behalf of the customer. When the proceeds from such settlement are not credited in any account, the customer must submit an affidavit on the compliance of the statutory limit.

Foreign exchange sales to resident customers must be made against a customer's own check or any effective means of debit to the customer's local account, except in those cases where cash sales are allowed.

Regarding exchange transaction with non-resident customers, when the purchase or sale exceeds the equivalent of US\$ 10,000 per calendar month established for all institutions authorized to trade in foreign exchange, the amount traded shall be credited to or debited from the local account held by the non-resident or the agent carrying out the transaction on behalf of the non-resident customer. When the proceeds from such settlement are not credited/debited in any account, the customer must submit an affidavit on the compliance of the statutory limit.

1.b. Foreign currency exchanges and arbitrages with customers

Institutions licensed to trade in foreign exchange may perform arbitrages and any foreign currency exchange with their customers, — either residents or non-residents —, under the following conditions:

- * For the entry of foreign exchange from abroad, the beneficiary may instruct the crediting of funds to a local account in foreign currency opened in their name at a financial institution. Institutions must issue technical tickets (recording the corresponding items) giving rise to no movements in the customer's accounts in pesos.

BANCO CENTRAL
DE LA REPÚBLICA ARGENTINA

- * Funds held in local accounts in foreign currency may be transferred abroad, recording the corresponding technical tickets (sale or purchase), giving rise to no movements in pesos.

In case of payment of foreign financing and repatriations of portfolio investment of non-residents, the institution shall ensure that the funds remain in Argentina at least 120 calendar days, where applicable, pursuant to the provisions of Decree No. 616/05, as amended.

- * Arbitrages in foreign currencies carried out in Argentina, when the amounts traded by the customer exceed US\$ 2,500 per calendar month, funds from one of the currencies shall be debited or credited in a local account in the customer's name at local financial institutions. Institutions must issue technical tickets giving rise to no movements in the customer's accounts in pesos.

Financial institutions shall credit any amount transferred from abroad to their customers' accounts in foreign currency, as well as debit any funds in foreign currency which are deposited in a local account to be transferred abroad.

Given the nature of these transactions which involve no movements in local currency but an exchange of foreign currency for local currency with a same counterparty, the institution shall issue technical exchange tickets (purchase or sale) for the same amount in foreign currency.

Where the amount of the funds transferred (i) from an account abroad or (ii) to an account abroad is denominated in the same currency than that of the local customer's bank account, the amount to be credited or debited by financial institutions shall agree with the funds transferred from or to an account abroad.

Where the amount of the funds transferred from or to an account abroad is denominated in a foreign currency other than that of the local customer's bank account, the amount to be credited or debited shall agree with the amount received from or sent abroad as per the market exchange rate in effect on the date of the transaction.

Any fee charged by an institution for these transactions shall be debited and itemized separately.

Financial institutions offering online banking services ("home banking") shall exhibit the fees for performing arbitrages and any foreign currency exchange in their website.

1.c. Permanent instructions for the deposit of funds transferred from abroad in foreign currency accounts

Customers may grant a permanent authorization to their financial institutions for the direct crediting of funds transferred from abroad to their accounts in foreign currency, provided paragraph I.8. of the Annex to Communication "A" 6037 is fully observed. Such paragraph sets forth, among other

requirements, that customers may not use this option in excess of US\$ 100,000 per calendar month across all financial institutions.

1.d. Cash withdrawals from ATMs located abroad

Purchases abroad as well as cash withdrawals from ATMs located abroad using a local debit card may be debited from a customer's local account irrespective of whether it is denominated in foreign currency or in pesos.

Financial institutions shall give their customers the option to choose and change the primary account and other accounts linked to their debit cards for purchases and cash withdrawals abroad, with the default primary account being the customer's account in foreign currency, if any.

In case of financial institutions offering online banking services ("home banking") customers may opt for the primary account linked to the purchases and cash withdrawals made abroad.

1.e. Foreign exchange market operating hours

Free and Single Foreign Exchange Market is open on business days from 10 am to 3 pm (official opening hours of Argentina). At provincial level, the foreign exchange market operates during the first five hours of the financial institutions' opening hours.

Institutions authorized to conduct foreign exchange transactions may extend their opening hours, without any limit of time, in order to purchase or sell foreign currency to or from their customers and to carry out other operations only involving foreign exchange.

1.f. Retail exchange rate. Exhibition in places where transactions with clients are performed. Posting on the BCRA's website

Institutions authorized to trade in foreign exchange shall clearly exhibit at all times and in a visible place where exchange transactions with customers are carried out, the retail exchange rates they offer for the purchase or sale of currency and travelers checks at least for the following currencies: US dollars, euros, British pounds, Swiss francs and currencies from bordering countries listing separately all expenses or fees, if any.

Notices shall be written with a font size suitable for reading and located in visible places for customers. These notices shall be available in every place where customers carry out traveler's checks and currency exchange transactions.

In case of exchange houses located in ports, international airports and international land terminals, retail exchange rates for purchase or sale offered by institutions shall not exceed 3% from the retail quote traded by Banco de la Nación Argentina on the same day and without fees. Regarding transactions during extended hours, such ceiling quotes shall be computed based on the closing rates published by Banco de la Nación Argentina as a benchmark.

BANCO CENTRAL
DE LA REPÚBLICA ARGENTINA

In order to achieve greater disclosure of retail quotes offered by institutions authorized to trade in foreign exchange, the website of the Central Bank of Argentina will disclose retail exchange rates offered in the Autonomous City of Buenos Aires (http://www.bcra.gov.ar/PublicacionesEstadisticas/Tipo_de_cambio_minorista.asp).

2. PROCEEDS FROM EXPORTS OF GOODS

Exporters are required to settle exports proceeds (FOB, CIF, as appropriate) in the foreign exchange market (Decree No. 1606/2001, Decree No. 1722/2011, and Communication “A” 3473, as supplemented). Deadlines to comply with such obligation were amended by Resolution No. 242/2016 issued by the Secretariat of Trade.

Under Decree No. 1003/2008, the obligation to enter foreign exchange proceeds from exports of domestic products is considered fulfilled when such proceeds are settled through the local currency payment system (SML) between the States Parties to the Southern Common Market (MERCOSUR), according to the conditions set forth by the Central Bank of Argentina (BCRA).

2.a. Deadlines for the Settlement of Proceeds from the Exports of Goods, Advances and the Pre-Financing of Exports

Deadlines for the settlement of proceeds from the exports of goods are calculated as from the date of the bill of lading and have been set by Resolution No. 269/2001 of the former Secretariat of Trade, as amended, and recently modified by Resolution No. 242/2016 of the Secretariat of Trade (Official Gazette of August 30, 2016). Under such amendment, exporters shall settle foreign exchange in the local financial system within 1,825 calendar days, irrespective of the tariff item involved.

Exporters may credit the proceeds from the sale of goods, advances and pre-financing of exports to a local account in foreign currency opened at a bank in their name. These funds must be settled in the local exchange market within the relevant deadlines to be compliant with the obligation of entry and settlement of foreign exchange (paragraph a) of item I.7 of Annex to Communication “A” 6037 and Communication “A” 5899, item 2).

Communication “A” 6037 superseded Communication “A” 5630 which had reinstated Communication “A” 3608 on the foreign exchange rate applicable to transactions that were settled beyond deadline. Based on the foregoing, matured transactions are settled at the closing exchange rate.

2.b. Follow-Up of Entry of Foreign Exchange Proceeds from the Exports of Goods in the Local Forex Market

Communication “A” 3493, as amended, (including Communication “A” 3848, “A” 4277, “A” 5752, “B” 8601, and Communication “A” 6057 of September 1, 2016) sets forth a control mechanism to

BANCO CENTRAL
DE LA REPÚBLICA ARGENTINA

ensure compliance with the obligation to enter foreign exchange proceeds from exports. Upon drafting the shipping documents, the exporter is required to appoint a financial institution which shall issue a “certificate of compliance” (showing that the obligation to either settle any foreign exchange transferred from abroad or assign them to an account overseas as set out in the exchange regulations has been discharged).

In the case of exports made by companies producing crude oil or its byproducts, natural gas, liquefied gas, and by mining companies, they are monitored as set forth in Communication “A” 5262.

On the other hand, foreign trade transactions may give rise to certain issues that are covered by follow-up regulations as mentioned below:

Shortfalls and Deficiencies: financial institutions in charge of monitoring shipping permits may accept any shortfalls and deficiencies without the prior approval of the BCRA, provided that such shortfalls and deficiencies are supported by the documentation submitted by the exporter. This also applies to temporary exported goods — with or without added value — whose re-importing to Argentina is unreasonable on account of their loss of value (impossible repair or high degree of deterioration). In addition, it is applicable to goods that have been damaged prior to delivery according to the conditions agreed between the exporter and importer (Communication “A” 5233).

Discounts and Service Charges Payable Abroad: the appointed financial institution may also issue a certificate of compliance when discounts and service charges payable abroad appear on the shipping permits and exporters provide supportive evidence of the purpose for which they access the local exchange market together with the prior approval of the Central Bank, where applicable (Communication “A” 5330 paragraph III). As for charges not included in the shipping permit (such as discounts made by importers on the sale of goods abroad that have not been established at the shipping date — such as charges arising from sales promotions and other discounts debited by the importer and accepted as customary to the sale for goods exported to the destination country), the certificate of compliance may also be issued to the extent that the amount in question does not exceed the equivalent of US\$ 5,000 per shipping permit, or the equivalent of US\$ 100,000 per calendar year per exporter (Communication “A” 5233).

Where the importer withholds an amount as a fine for any delays incurred by the exporter when delivering the goods, the institution may issue a certificate of compliance to the extent that such fines are contemplated in the international purchase and sale agreements entered into prior to the shipping date, and provided that the delay is effectively verified and the parties involved are not related companies (subparagraph 1.6 of Communication “A” 5233, included by Communication “A” 5701).

Goods Totally or Partially Rejected at Destination: these goods, which are subsequently re-imported to Argentina are referred to in paragraph 5. of Communication “A” 5135.

BANCO CENTRAL
DE LA REPÚBLICA ARGENTINA

Exports of Products Sold Based on FOB Prices and Subject to Further Change: In these cases (prices subject to change – Resolution 2780/1992 of the former National Customs Administration) and in the case of products exported pursuant to the Mineral Concentrate Regime (Resolution 281/1998 of the National Tax Authority), the mechanisms set forth in Communications “A” 3678 and “C” 36260 shall apply.

Shipment of Goods Exempted from Follow-Up Requirements: Customs operations as under Communications “A” 3587, “A” 3693, “A” 3751, as amended by paragraph 1 of Communication “A” 5135, “A” 3812, “A” 3813 and “A” 4099 are exempted from the mechanisms to monitor the settlement of proceeds from exports of goods.

In terms of reshipments covered by the ZFRE sub-regime, financial institutions appointed for the follow up of foreign exchange transactions may consider the entry requirement as met when shipments agree with imports carried out through a ZFI. In this case, the access to the local exchange market for the payment of imports of goods entering the free zone is not allowed since these transactions do not involve sales from a non-resident to a resident (paragraph 2. of Communication “A” 5135).

Paragraph 4 of Communication “A” 5135 explains how to achieve compliance in the case of re-exported unused goods as under the in-factory customs regime (RAF), and recorded through the RR01 sub-regime (National Tax Authority General Resolution 1673/04).

In addition, Communication “A” 4839 authorizes financial institutions in charge of monitoring shipping permits to issue a certificate of compliance for such documented transactions with the “EXPONOTITONEROSO” (non-commercial exports) customs benefit that do not generate an equivalent in foreign exchange, provided that the requirements set forth by the regulation are met. Moreover, it establishes that in the cases not covered by the regulation, the institution concerned may consult with the BCRA, by attaching an external auditor certification to attest that based on the customer’s documents as well as on-balance and off-balance sheet items, the good delivered to the non-resident involved no payment (paragraph 7 of Communication “A” 5135). Additionally, the above-mentioned provisions apply to documented exports with EXPOSINVALORCOM customs benefit (Communication “C” 52211).

EXW, FAS, DDP and FCA Trading Conditions: Communications “A” 3922, “A” 4004 and “A” 4076 set forth the follow-up mechanisms to be used for the entry of foreign exchange proceeds from goods exported under EXW, FAS, DDP and FCA trading conditions, respectively.

Undelivered Shipments Due to the Importer’s Failure to Pay – Collection Management: in these cases, when the importer’s failure to pay results from exchange controls in the importing country, subsequent insolvency or non-performance of the foreign importer (with or without legal actions filed against them, and regardless of their export credit insurance coverage), the financial institution following-up on the shipping permit must report it as undelivered according to the regime in force, stating that a collection management process has already been started without the need to have the prior approval of the BCRA, provided that the specific conditions set forth in

each case have been met as per Communication “A” 5019, as amended by paragraph 5. of Communication “A” 5899. Under paragraph III of Communication “A” 5729, once the failure to pay is resolved and the importer makes the payment, the Argentine exporter or the export credit insurance company, as applicable, shall have to enter foreign exchange proceeds from exports within 5 business days of the date the funds became available.

Shipments with Amounts Withheld for Taxes Applicable in the Country of Destination: in these cases, financial institutions appointed to make a follow-up on the shipping permits may issue a certificate of compliance for the amount withheld abroad, provided that the documents detailed in Communications “A” 4922 and “C” 62405 are submitted.

Shipments of Temporarily Imported Goods without Transfer of Foreign Exchange: paragraph 6. of Communication “A” 5135, as explained in Communication “C” 61688, gathers the regulations for the mechanism through which the institutions appointed to follow-up shipping permits may determine that the exporter has complied with the entry requirement up to the amount of the temporarily imported goods included in the value of the exported goods, provided that the imports are being made without the transfer of foreign exchange.

Exports to Venezuela under the Financial Mechanism Agreed between Argentina and Venezuela. Communication “A” 5276 sets forth the provisions for the follow-up of the entry of foreign exchange proceeds from exports of goods shipped to the Bolivarian Republic of Venezuela, the payments of which were collected through the Financial Mechanism established by the Comprehensive Convention on Cooperation entered into by said country and the Argentine Republic on April 6, 2004, as amended.

2.c. Proceeds from the Exports of Goods to Pay Advances and the Pre-Financing of Exports, as well as Other External Credit Facilities

Proceeds from the exports of goods can be allocated to pay the exporter’s debts abroad in the following cases:

- Advances and pre-financing of exports (paragraph 5. of Communication “A” 3473).
- Financing of new investment projects in Argentina aimed to increase the production of goods that will mostly be sold abroad, the production of goods that allow for import substitution, or else the transport capacity for exporting goods and services through infrastructure works at ports, airports and international land terminals, subject to the compliance with all other requirements set forth in subparagraph 7.1. of Communication “A” 5265, as amended by Communications “A” 5464 and “A” 5475, and supplemented by Com. “A” 5597.
- Other financing from bonds issued abroad and loan facilities with foreign banks or local financial institutions in foreign currency, provided that the following conditions are met: term (not less than 10 years), average life (not less than 5 years) and financing interest rate (up

to a spread of 100 b.p. over the Libor rate to 180 days), as well as all other requirements set forth in subparagraph 7.2 of Communication "A" 5265.

Communication "A" 4110 establishes the regulations on mergers. As from the date of registration of the merger in the Public Registry of Commerce, the following shall be deemed transactions of the merging, or the surviving company, as applicable: export transactions of goods and services pending entry and settlement in the local foreign exchange market, and outstanding advances and export pre-financing loans from dissolved companies undergoing a merger process.

3. ARGENTINE IMPORTS OF GOODS AND OTHER GOODS PURCHASES FROM ABROAD

Please refer to paragraph II of the Annex to Communication "A" 6037.

Importers shall submit an affidavit stating compliance with the "Disclosure of Financial and Non-Financial Private Sector Issues of Securities and other External Liabilities" (Com. "A" 3602) in relation to the payment transferred abroad and compliance with the "Disclosure of Direct Investment" (Com. "A" 4237), if applicable.

In addition, financial institutions may access the foreign exchange market to make transfers abroad for paying guarantees granted in relation to Argentine imports of goods.

Payments Transferred Abroad for Argentine Imports of Goods Comprise: (1) payments made in advance of the delivery date of goods under the purchase conditions agreed upon with the foreign supplier, (2) payments at sight for imports of goods, and (3) deferred payments for imports.

Other Purchases of Goods from Abroad include, among other things: (1) inputs, equipment, and spare parts for construction, repair, maintenance or replacement of parts of facilities and (2) goods purchased, but not entered into Argentina, to be sold abroad.

4. RENDERING OF SERVICES, RETURNS, AND CURRENT TRANSFERS AND NON-PRODUCED NON-FINANCIAL ASSETS

Please refer to paragraph III of the Annex to Communication "A" 6037.

4.a. Rules on inflows

All funds received in foreign currency by residents from non-residents for exports of services and collections of insurance claims which are in accordance with legal regulations but do not fall under the international trade of goods (the latter being governed by regulations applicable to proceeds from exports and import payments) shall enter Argentina (for settlement in the foreign exchange

market or crediting to local accounts in foreign currency) within 365 calendar days after the date of collection in Argentina or abroad, or after their crediting to overseas accounts.

The 100% of the amounts actually collected in foreign currency for services provided to non-residents shall be entered net of any withholdings or discounts applied abroad by the customer and/or through international clearing systems for transactions carried out in several countries. The net amount cleared over the period is settled and made available to the resident company. These international systems for the settlement of items cleared must be generally accepted.

Any foreign currency collected by residents for the sale of non-produced non-financial assets shall enter Argentina (for settlement in the foreign exchange market or crediting to local accounts in foreign currency) within 365 calendar days after the date of collection in Argentina or abroad or after their crediting to overseas accounts.

Should a retirement or pension beneficiary decide to credit the funds received into his foreign currency account, the institution may credit the funds directly with the client's authorization, recording an exchange ticket in accordance with the applicable regulation.

4.b. Rules on outflows

In order to access the foreign exchange market to make transfers abroad for the payment of services, interest, profits, and dividends and to purchase non-produced non-financial assets, an affidavit stating compliance with the "Disclosure of Financial and Non-Financial Private Sector Issues of Securities and other External Liabilities" (Com. "A" 3602) must be filed, if applicable, in relation to the payment transferred abroad and compliance with the "Disclosure of Direct Investment" (Com. "A" 4237).

In the case of personal transfers, when the amount involved exceeds the equivalent of US\$ 2,500 per customer, per calendar month in all institutions authorized to carry out foreign exchange transactions, foreign exchange sales must be debited from the customer's account.

5. FINANCIAL DEBTS

Please refer to paragraph IV of the Annex to Communication "A" 6037.

5.a. Funds from foreign financial debts entering the foreign exchange market

Financial debt transactions made abroad by the financial sector, the non-financial private sector and local governments are not subject to the requirement of entry and settlement in the forex market.

However, irrespective of funds entering or not into the market, debts arising from transactions made by the non-financial private sector and the financial sector are required to be registered in

BANCO CENTRAL
DE LA REPÚBLICA ARGENTINA

the “Disclosure of External Liabilities and Debt Security Issues” (Com. “A” 3602) pursuant to Section 1 of Decree No. 616/05.

In turn, all financial debt transactions made abroad by the financial sector and the non-financial private sector which funds enter the foreign exchange market must be agreed and paid under terms not less than 120 calendar days pursuant to the provisions of Decree No. 616/05, as amended. Moreover, whatever the means of payment used, payment may not be made before said period has expired.

The term requirement mentioned above does not apply in the case of primary issuances of debt securities which are listed and traded in authorized markets, and outstanding balance on correspondent accounts of institutions authorized to trade in foreign exchange, as far as they do not involve a credit line. If they do, funds shall meet the requirements for financial borrowings. This exemption further applies to debts arising from credit facilities granted by multilateral or bilateral credit organizations and official credit agencies, either directly or through their related agencies, in keeping with their objectives.

5.b. Payment of foreign financial debts

In the case a customer accesses the exchange market for the service of principal of foreign financial debts, including the payment of financial stand-by agreements granted by local banks, he must file a debtor’s affidavit stating compliance, if applicable, with the “Disclosure of Private Sector External Liabilities and Debt Security Issues” debt statement (Com. “A” 3602) as well as compliance with the minimum 120-day term, as under the provisions set forth in Decree No. 616/05, as amended.

5.c. Payment of local issues of debt securities in foreign currency

In the case a customer accesses the exchange market for the service of local debt securities, they must submit an affidavit whenever previous submission of the “Disclosure of Private Sector External Liabilities and Debt Security Issues” debt statement applies (Com. “A” 3602).

5.d. Other provisions on financial debts

Payment to foreign creditors of advances and pre-financing of exports that are direct debts not endorsed by local banks with no exports in return are governed by the regulations applicable to the payment of foreign financial loans. To that effect, the date of origin shall be the date on which the foreign exchange is brought into the country, except the following cases which retain their commercial nature:

- i) Repayment of export advances when the exporter is unable to comply with the shipment in time as agreed with the customer, due to the suspension of shipments ordered by a state regulation in force as from the advance disbursement date.
- ii) Repayment of export advances when the exporter complied with the shipment, but the goods are rejected by the importer and re-imported into the country. In this case, documentation

evidencing that the goods have been re-imported must be submitted to the relevant institution before having access to the local foreign exchange market.

- iii) Payment of advances and the pre-financing of exports, whenever after using foreign exchange arising from shipments to make such payments, there is an outstanding amount resulting from the transaction entered into the foreign exchange market, not exceeding 5 % of the amount entering Argentina or US\$ 5,000, whichever is higher.
- iv) Repayment of advancements collected from the export of goods to a foreign creditor, not exceeding US\$ 10,000 per calendar month within the group of institutions authorized to trade in foreign exchange. This access to the foreign exchange market is in addition to that provided for in the preceding paragraph.

Debts owed by direct investment companies to their headquarters and/or branches abroad are governed by exchange regulations in force applicable to the external indebtedness, irrespective of the kind of creditor.

6. PURCHASE OF FOREIGN ASSETS OF RESIDENTS

Please refer to paragraph V of the Annex to Communication "A" 6037, amended by Communication "A" 6058.

Residents in Argentina other than institutions licensed to trade in foreign exchange may access the local exchange market to purchase foreign assets without any limit as to the amount.

When the amount traded exceeds US\$ 2,500 per calendar month established for all institutions authorized to trade in foreign exchange, the transaction can only be made through a debit to a sight account opened in the customer's name at local financial institutions, or through an Electronic Means of Payment (MEP) transfer to the relevant institution from sight accounts the customer maintains with any financial institution, or through a check payment from the customer's own account.

In the case of sales of foreign exchange to residents for the purpose of making portfolio investments abroad, proceeds must be transferred to an account or directed to build up the stock of external financial assets registered under the name of the customer. Likewise, there are also requirements applicable to the country where the portfolio is invested.

7. FINANCIAL DERIVATIVES

Please refer to paragraph VI of the Annex to Communication “A” 6037.

Residents may access the foreign exchange market to pay for premiums and collaterals and to settle, as applicable, futures, forwards, options and other derivatives transactions conducted in institutionalized markets abroad or carried out with non-resident counterparties.

Futures transactions conducted and paid in regulated markets, as well as forwards, options and other types of derivatives transactions settled in Argentina and cleared in domestic currency are not subject to prior compliance with the requirements of the exchange regulations.

Local transactions referred to above are implemented under Argentine laws, irrespective of the place of residence of the contracting parties, which in no case may involve present or future obligations to make transfers abroad or local payments in foreign currency.

As far as financial institutions are concerned, regulations set forth in Communication “A” 6038 apply.

8. FOREIGN EXCHANGE TRANSACTIONS WITH NON-RESIDENTS

Please refer to paragraph VII of the Annex to Communication “A” 6037, amended by Communication “A” 6058.

Authorized institutions may, with the customer’s affidavit relating to the purpose of the transaction involved, proceed with the purchase of foreign exchange for the transfer abroad as well as the sale of notes, checks and traveler’s checks in foreign currency for the following non-resident customers:

1. International organizations and institutions acting as official export credit agencies, detailed in paragraph IV of the Annex to the Communication referred to above.
2. Diplomatic and consular missions accredited in the country, regarding the transactions made in the exercise of their duties.
3. Representative offices in Argentina from Courts, Authorities or Departments, Special Missions, Bilateral Commissions or Bodies created by International Treaties or Agreements — to which the Argentine Republic is a party — for transactions made in the exercise of their duties.

All other non-resident customers may also purchase foreign exchange to be transferred to accounts abroad, provided that they submit supporting documents showing that the funds originate from the:

1. Payment at sight of Argentine imports.

BANCO CENTRAL
DE LA REPÚBLICA ARGENTINA

2. External debts of residents arising from the Argentine imports of goods.
3. Services, returns and other current transfers to other countries.
4. Financial debts from foreign loans to non-residents.
5. Return on bonds and secured loans from the National Government issued in local currency.
6. Recovery of claims in local bankruptcies and debt collection from insolvency proceedings provided that the non-resident customer is the judgment creditor with a final court decision.
7. Inheritances, according to the affidavit of heirship.
8. Compensations, servicing or sale of amounts received from the Government under the provisions of Laws Nos. 24,043; 24,411 and 25,914.
9. For transactions made through the reciprocal payments and credits agreements subscribed with ALADI (Latin American Integration Association) and the Dominican Republic, and through bilateral agreements subscribed with the Russian Federation and Malaysia, discounted in foreign institutions, and collected on accounts opened with local institutions, provided that the exporter has entered and settled the funds received from abroad in the MULC.
10. Repatriation of direct investments in the non-financial private sector, companies that are not parent entities of local financial institutions, and/or real property, provided that the foreign beneficiary is a natural or legal person residing, incorporated or domiciled in domains, jurisdictions, territories or associated States that are considered “cooperators for the purposes of fiscal transparency” according to the provisions of Section 1 of Decree No. 589/13, as amended, involving the following transactions:
 - i. Direct investment sale.
 - ii. Final settlement of direct investment.
 - iii. Capital reduction by a local company.
 - iv. Return of irrevocable contributions made by a local company.

In these cases, compliance with Disclosure of Direct Investment must be verified, if applicable.

11. Amounts collected from the servicing of principal or from the sale of other portfolio investments (and their return), provided that the foreign beneficiary is a natural or legal person residing, incorporated or domiciled in domains, jurisdictions, territories or associated States that are considered “cooperators for the purposes of fiscal transparency” according to the provisions of Section 1 of Decree No. 589/13, as supplemented and amended.

These repatriations of portfolio investments include, among others, portfolio investments in stocks and shares in local companies, investments in mutual funds and local trusts, purchase

of loan portfolios granted to residents by local banks, purchase of invoices and promissory notes arising from local business transactions, investments in local bonds issued in pesos and foreign currency payable in Argentina, and purchases of other domestic credit.

In these cases, to access the exchange market, the non-resident shall obtain a certification from a local financial or exchange institution to substantiate the date and amount of the funds placed for investment that have been settled in the foreign exchange market. In turn, such institution shall ensure that the funds remain in Argentina at least 120 calendar days from the date of entry into the country.

The above-mentioned requirements do not apply in the following cases:

- i. When funds correspond to the collection in pesos in Argentina of credits originating from debts of imports assigned by the importer to a third party.
- ii. In the case of investments made by natural persons who use funds covered by the provisions of Decree No. 616/05 during their residence in Argentina, and subsequently settle abroad, provided that the institution has documentation supporting the date of change of residence.
- iii. When the source of investment is the collection in Argentina of any of the transactions for which the non-resident would have had access to the market for the repatriation of funds at the time of collection.

Communication "C" 72679 specifies that the repatriation of funds arising from the servicing of principal and interest or from the sale of government securities in Argentina is not subject to the requirement of evidencing settlement in the forex market nor of ensuring that the funds remain in Argentina for a term of 120 days, provided that they have been acquired by non-residents at the primary subscription.

12. Compensation decided by local courts in favor of non-residents.

In the cases mentioned above, the resident is also allowed access to the exchange market in order to transfer funds in favor of the non-resident, but before granting such access, the institution must verify compliance with applicable requirements.

All other transactions involving the sale of foreign exchange, notes, checks and traveler's checks in foreign currency to non-residents may be performed without the prior approval of the Central Bank of Argentina, provided that the amount in question does not exceed the equivalent of US\$ 10,000 per calendar month in all institutions authorized to carry out foreign exchange transactions.

Where the servicing of principal and interest as well as returns on government securities issued by the national government in foreign currency and other bonds issued by residents in foreign currency which are deposited by non-residents in local custody accounts, the non-resident may choose from any of the following options: collection in foreign currency, deposit in a local account

BANCO CENTRAL
DE LA REPÚBLICA ARGENTINA

in foreign currency in their name or retransfer of funds to an account in their name abroad. In these cases, no exchange tickets are made.

If after the servicing of principal and interest, the beneficiary of the funds wishes to convert the funds collected in foreign currency to local currency, the purchase shall be carried out in the foreign exchange market pursuant to general regulations for portfolio investments by non-residents.

9. THE GENERAL EXCHANGE POSITION OF AUTHORIZED INSTITUTIONS

Communication "A" 4646, amended by Communication "A" 4814, sets forth eligible liquid foreign assets for the General Exchange Position (Posición General de Cambios, PGC), the maximum limit calculated based on the regulatory capital, the maximum limit for particular cases and their adjustments.

Communication "A" 3640 sets forth that the institutions authorized to trade in foreign exchange require the prior approval of the Central Bank to purchase on their own behalf any other types of instruments, when payment is made against delivery of foreign currency or other external assets that are conceptually part of the PGC.

Local financial institutions can access the market without the prior approval of the Central Bank whenever they need foreign exchange for the purchase and sale of securities from their own portfolio in the case of transactions specified in Communication "A" 6067 (replacing paragraph 23. of Communication "A" 5850, which, in turn, had been supplemented by Communication "A" 6011). Anyhow, they shall issue the corresponding exchange ticket.

10. CAPITAL MARKETS

Transactions with securities in self-regulated exchanges and securities markets shall be paid through any of the following: (a) in AR\$, using any of the methods available from payment systems; (b) in foreign currency, through electronic transfers from/to sight accounts with local financial institutions; and (c) through wire transfers from/to accounts abroad. Under no circumstances may the purchase/sale of securities be paid in cash in foreign currency or through deposits to custody or third parties' accounts (Communication "A" 4308).

Communication "A" 5812 provides that natural persons who receive foreign currency payments for servicing in a local custody account may reinvest such funds to make payments abroad related to any new transactions they may conduct, as long as allocation entails neutral taxation.

11. DISCLOSURE OF FINANCIAL AND NON-FINANCIAL PRIVATE SECTOR ISSUES OF SECURITIES AND OTHER EXTERNAL LIABILITIES

Communications “A” 3602 and “A” 4062, as amended, establish a system to disclose external liabilities and securities issuances, to which natural and legal persons from the financial and non-financial private sector owing debts to non-residents are bound. Data shall be submitted at the end of each calendar quarter.

Where bonds and other debt securities have been jointly issued by more than one issuer, each of them shall disclose their share under the general rules (paragraph 6. of Communication “A” 6011) along with the amount of their joint and several liabilities.

Debts incurred and being paid in the same calendar quarter shall not be disclosed.

12. DISCLOSURE OF DIRECT INVESTMENT

Communication “A” 4237 establishes a system to disclose direct investments in Argentina by non-residents and direct investments abroad by Argentine residents, which includes:

12.a. Direct Investment in Argentina by Non-Residents

Disclosure is mandatory for resident legal persons with non-residents’ direct investment interests and agents of non-residents’ real estate. Thus, they shall submit a statement of non-residents’ direct investment holdings in Argentina, as modified during the reported period. This further includes holdings of natural or legal persons which, at the beginning of the reported period, have been settled within six months before the reference date. Disclosure shall be made at the end of each calendar six-month period.

The reporting system as under Communication “A” 4305 provides that disclosure is mandatory where the amount of non-residents’ holdings in Argentina —including their share in the company’s net worth and/or the aggregate real estate assessed values — equals or exceeds the equivalent of US\$ 500,000. Otherwise, disclosure shall be optional.

12.b. Argentine Residents’ Direct Investment Abroad

Disclosure is mandatory for all resident natural and legal persons with direct investments abroad in the form of interests in any company, whether financial or not, and in real estate. This further includes holdings of natural or legal persons which, at the beginning of the reported period, have

been settled within six months (for half-year statements) or twelve months (for annual statements) before the reference date.

The reporting system as under Communication "A" 4305 provides that disclosure is mandatory where the amount of holdings abroad by residents subject to disclosure — comprising the sum of their interests in the foreign company's net worth and/or the foreign real estate assessed values — equals or exceeds the equivalent of US\$ 1,000,000.

If the amount of these holdings equals or exceeds the equivalent of US\$ 1,000,000 and equals or is under US\$ 5,000,000, disclosure may be made on an annual basis, rather than half-yearly, at the end of each calendar year. Should holdings not reach the equivalent of US\$ 1,000,000, disclosure shall be optional.
